**Nexus**

# first project: ecommerce

- Devlope online store for buying products and the admin can add products to there store , also we add payment using ppypl carte ,and if the store owner has gift card the client can use gift card then devlop app for this platform to make purchases and add to shopping cart ,
- note :the visitor can add to there shopping cart also and when register he find there products
  - devlop also a desktop app for manage any store ,products ,stock,clients, validate buying products) ,like yassna desktop app for example

Nexus

# second project: restaurants

- Devlope online platform for buying repas and the admin can add repas of there restaurant to there platform, also we add payment using pypypl carte ,and if the restaurant owner has gift card the client can use gift card then devlop app for this platform to make purchases and addd to shopping cart ,
- note :the visitor can add to there shopping cart also and when register he find there products
  - devlop also a desktop app for manage any restaurant,repas,quantities, validate buying products

Nexus

# third project: E-platform

- Develop online platform for bac preparation and the admin can add courses generated by AI platforms to the platform , also we add payment using pycart , and also add subjects of bacs, and students can use the platform after subscribe for 7 days then must payed to see courses and we add more details about this project later..,and we develop app for this platform also

Nexus

# forth project: Suppermarket management

- Devlope online platform for suppermarkets and the admin can add products of there supermarket to there platform, also we add payment using ppypl carte ,and if the suppermarket owner has gift card(carte fidelité) the client can use gift card, then devlop app for this platform to make purchases and addd to shopping cart ,
- note :the visitor can add to there shopping cart also and when register he find there products
- devlop also a desktop app for manage shelves of te supermarkets, and also for validate shopping of clients like “yassna ”
